ALUMNI REGISTER

The Alumni Register contains the names of all alumni of the Western Illinois State Normal School from 1903 to 1915 inclusive, and with the exception of two the present addresses of all alumni now living.

The material was first collected last year, but it took so long to get it together that it could not be published before the end of the year, and therefore it was put aside until this year, which made it necessary to bring the addresses up to date in so far as possible. Not all responded, but the present addresses as indicated are for either this year or last.

No claim is made for absolute accuracy in this bulletin. The reports are printed as nearly as possible just as the cards returned by the alumni showed them. Any alumnus who discovers an error either in his or some other record will confer a favor on his Alma Mater by notifying the president.

Following each name is the address of the alumnus at the time he entered school. Following this is his teaching record. Next is given his student record after graduation, and then follows his permanent address.

The following facts are of some interest and reflect much honor to the school and alumni:

There are five hundred fourteen alumni.

Of the alumni, seventy-eight are men and four hundred thirty-six are women.

Three hundred twenty taught during the last year.

Two hundred four of these were in the grades, sixty-three were in high schools, thirty-two were principals, fifteen were superintendents and fourteen were teaching in higher institutions.

One hundred thirty-three have continued their work as students in higher institutions.

Thirty-one have taken bachelor's degrees, six have taken master's degrees and two have taken a doctor's degree.

Four hundred nineteen are at home in Illinois, two in Arizona, one in Arkansas, six in California, three in Colorado, one in Georgia, three in Idaho, six in Indiana, ten in Iowa, three in Kansas, one in Kentucky, one in Massachusetts, two in Michigan, six in Minnesota, nine in Missouri, four in Montana, four in Nebraska, two in New Mexico, five in New York,

one in North Dakota, four in Ohio, three in Oklahoma, one in South Dakota, one in Texas, five in Washington, six in Wisconsin, one in Canal Zone, three in Canada and ten in the Philippine Islands.

AN ANNOUNCEMENT CONCERNING THE SECOND DIPLOMA.

For several years it was the custom of this school to give a few of the graduates of each class second or post-graduate diplomas after two or three years of highly successful teaching in the public schools of this state.

The process by which this was done was as follows: A committee of the faculty suggested the names of some of the graduates concerning whom good reports had reached us. These were considered by the faculty as a whole, and some of these, at least, not always all, were chosen as ones suitable to have their teaching records investigated with the thought of finding out if they were entitled to our second diploma. The ones under consideration were requested to make a full professional report of their work in teaching since graduation. The superintendent of schools, the president and secretary of the board of education were asked to answer as to their success as teachers. If all of these reports on any one were favorable, a member of the faculty was sent to visit him and report back to the faculty. Finally, if this report turned out to be favorable, the faculty recommended that the second or post-graduate diploma be given.

In the first place, the committee had no adequate way of getting information as to what graduates had been highly successful. This was easier when the number was small. In the second place, the replies from the school officials were not always full enough that the success of the teachers could be determined. In the third place, the member of the faculty who visited the teacher did so under conditions often which were unfavorable to the teacher, or which left the visitor unable to make a definite decision.

A few who were investigated received unfavorable reports in some cases from school officials who were not wholly familiar with the conditions. They were not given second diplomas.

Some who were visited by the faculty received unfavorable reports, or else the visitor reported that he was not sure, due to the fact that a single day's visit was too short to determine. These were not given second diplomas.

Since reports were required from school officials as to the records of the teacher who was investigated, these officials felt that the teacher was not a success unless he was given

the second diploma. This reacted against the teacher in some cases.

The feeling steadily grew among the graduates that unless they were considered for second diplomas within two or three years after graduation, the school felt that they had not been a credit to it. Those who were considered and did not receive the second diploma felt in some cases that they were disgraced, or that they had been complete failures.

The above points, after having been considered for two or three years by the faculty led them to decide at a meeting held October 12, 1914, not to give any more second diplomas, at least until the plans for doing so could be made more adequate and result in greater fairness.

An effort is being made to follow up the work of the alumni and compile data which will enable the school to furnish a complete record of any graduate to any school official who may seek such information. It is hoped that the alumni will also co-operate with the school by notifying us of vacancies which are to occur and of their desire for new positions. This will enable the committee on recommendations to do valuable work in locating our alumni.
